[1] CAHPS measures combine responses to several questions, some of which have different response options (e.g., never, sometimes, usually, or always, and yes; definitely, yes, somewhat, or no). Performance rates for CAHPS measures do not represent a percentage but rather your ACO's mean (average) performance for each measure and is presented on a 0-to-100 scale. A higher CAHPS measure performance rate indicates that beneficiaries in your ACO were more likely to report positive experiences. For more information, please see the detailed CAHPS report that accompanies this report.

[2] A domain improvement score of at least 90% receives 4 Quality Improvement Reward points; ≥80% receives 3.56 points; ≥70% receives 3.12 points; ≥60% receives 2.68 points; ≥50% receives 2.24 points; ≥40% receives 1.8 points; ≥30% receives 1.36 points; ≥20% receives 0.92 points; ≥10% receives 0.48 points. A domain improvement score less than 10% receives 0 Quality Improvement Reward points.

[3] An ACO will be held harmless if their performance on a measure significantly declined, but remained above 90% (or in the case of certain measures, above the 90th percentile benchmark) in both the current year and previous year.

[4] For P4P measures: Points are calculated based on the ACO's performance compared to the 2018 quality measure benchmarks; For P4R measures: Full points are awarded if the ACO completely reports.

[5] The prior year performance rates for several measures have been updated. Specifically: performance rates in the Patient/Caregiver Experience domain have been updated to reflect the revised 2018 CAHPS for ACOs survey, to allow for comparability; the ACO-36 performance rate has been updated to correct a non-material technical error, as announced in the Next Generation ACO newsletter.
